Dear Mr. Broadbent:

This is to advise you that the Bay Area Air Quality Management District has decided to issue a significant revision to the Major Facility Review Permit for Calpine Gilroy Cogen, L.P (Facility Number B1180) and issue an acid rain permit.

The purpose of this project is to install three 45 MW turbines for the purpose of generating electricity, to change the existing permit conditions to allow installation of the project, and to issue an acid rain permit to the facility.

The following changes were also made:

- The existing cooling tower (S-104) was added to the permit since it is no longer exempt.
- Regulation 6-310 has been added for S-104.
- The citation of Regulation 6-301 and 6-310 has been corrected in Section IV and Section VII.
- The basis was corrected for Condition 18102, parts 22, 24, 25, 26, 30, 31, 32 and 35.

A final copy of the revised Major Facility Review/Acid Rain Permit is enclosed for your information. If you have any questions on this matter, please call **Steve Hill, Air Quality Manager, at (415) 749-4673.**

Very truly yours,

Ellen Garvey  
Executive Officer/  
Air Pollution Control Officer
